1. Introduction

The **Library Management System (LMS)** is a comprehensive and user-friendly digital solution designed to modernize the operations of an academic library. It replaces traditional manual record-keeping methods with an efficient, secure, and centralized online platform.

The system is developed to support the needs of **students, faculty members, librarians, and administrative staff**, ensuring smooth and transparent management of all library resources such as books, journals, e-resources, and other reference materials.

Through this system, librarians can easily manage book catalogues, track issues and returns, handle fines, and generate detailed reports — all from a single dashboard. Students and faculty can view available books, reserve or borrow materials, track their borrowing history, and request new titles as per their academic requirements.

The **LMS** enhances productivity and accountability by providing:

- A **centralized database** to store all book and user records.
- **Role-based access control**, ensuring secure and personalized experiences.
- **Automated fine calculation and real-time reporting.**
- Seamless tracking of issue, renewal, and return processes.
- Easy scalability for future features like RFID integration and mobile app support.

In essence, the **Library Management System** aims to bridge the gap between traditional library management and modern digital access, fostering a smart, organized, and user-centred library experience for all.

2. Target Users

The system is designed for the following users:

- **Librarian:** Manages all library operations, including adding resources, handling circulation, reports, and fines.
- **Assistant Librarian:** Supports the librarian with daily tasks like issuing, returning, and managing reservations.
- **Student:** Can borrow, reserve, renew, and view their borrowing history and overdue items.
- **Faculty:** Has the same features as students to borrow and manage academic resources easily.

3. Modules Overview

3.1 Login Module

The **Login Module** is the **first interface** that appears to every user of the system. It serves as the main entry point for accessing the Library Management System.

Each user — whether **Librarian, Assistant Librarian, Faculty, or Student** — must log in using the **credentials provided by the University**. These credentials ensure that only authorized users can access the system and their respective dashboards.

After successfully logging in, users are **redirected to their respective dashboards** based on their roles:

- **Librarian Dashboard** – for managing library materials, issuing and returning books, and monitoring overall activity.
- **Assistant Librarian Dashboard** – for assisting in circulation, managing reservations, and maintaining records.
- **Faculty Dashboard** – for viewing, reserving, and requesting learning resources.
- **Student Dashboard** – for searching materials, placing reservations, and tracking their issued books.

The module also includes validation features to ensure secure access, such as:

- Input validation for username and password fields.
- Error messages for incorrect credentials.
- Session management for secure and consistent user access.

Overall, the **Login Module** provides a **secure, user-friendly, and role-based gateway** for accessing the Library Management System.

3.2 Librarian Dashboard

The **Library Admin Dashboard** is the **main control panel** that appears after a successful login by the Librarian or Admin. It provides a complete overview of library activities, resource availability, and pending operations — all in one place.

Once the librarian logs in with valid university credentials, they are redirected to this dashboard, which offers **real-time insights** and **quick navigation** through the library's core modules.

Dashboard Overview

The dashboard contains multiple **information cards** and a **side navigation menu**, helping the librarian manage day-to-day library operations efficiently.

Key Components:

- 1. Total Library Resources**
Displays the total count of books and other library materials currently available in the system.
- 2. Active Issued Library Resources**
Shows the number of materials that are currently issued to patrons (students or faculty).
- 3. Overdue Status**
Provides details about books that are overdue or nearing their due date.
 - Overdue Items: Number of books already overdue.
 - Upcoming Overdue: Books that will be due soon within selected days.
- 4. Pending Issues**
Lists the total number of issue requests awaiting approval or processing by the librarian.

5. **Pending Booking Listed**

Displays the count of materials booked by patrons that are yet to be approved or issued.

6. **Low Stock Library Resources**

Alerts the librarian about materials that have reached the minimum stock limit, helping in timely replenishment.

Navigation Menu

The left sidebar provides quick access to key modules:

- **Dashboard** – Returns to the main overview page.
- **Catalogue Management** – Add, edit, and organize library resources.
- **Circulations** – Handle issue, return, and reservation of books.
- **Fine Management** – Manage overdue fines for patrons.
- **Barcode Generation** – Generate barcodes for new materials.
- **New Library Resource Requests** – View and approve material requests.
- **Reports** – Generate and view analytical or summary reports.

Additional Features

- **Add Books Button:** Allows quick addition of new library resources directly from the dashboard.
- **Profile Section:** Located at the top-right corner, providing access to profile settings and logout.

3.2.1 My Profile & Logout

The **My Profile** section allows all users to manage their personal account settings securely. This includes editing personal information and changing the account password.

Key Features:

- **Edit Profile:**
 - Users can update their name, email, contact details, and other personal information.
 - Changes are saved securely and reflected immediately across the system.

3.2.1 Catalogue Management

The **Catalogue Management** module allows librarians to efficiently manage all library materials and related information. It ensures that every resource is properly recorded, categorized, and maintained for easy access and circulation.

This module provides several key options through dropdowns:

Add Library Resource

This feature allows librarians to add new books or materials to the library database. It includes details like **Title, Author, ISBN, Publisher, Edition, Year of Publication, and Resource Type**. Once added, these materials become available for circulation and searching in the library catalogue.

The screenshot displays the 'ICFAI Library Admin' dashboard. On the left is a dark sidebar menu with options: Dashboard, Catalog Management, Circulations, Fine Management, Barcode Generation, New Library Resource Requests, and Reports. The main content area is titled 'Add New Library Resource' and contains a form with the following fields:

Title	Author (Start typing author name...)	Publisher	Place of Publishers
Year Published (Select Year)	Edition (Select Edition)	Book Type (Select Material Type)	Description
Pages	Vol	Source	Price
ISBN	Available Quantity	Total Quantity	Call Number (Optional) (Optional)

An 'Add Material' button is located at the bottom left of the form. The footer of the page reads: '© 2025 ICFAI Library Management System | Developed by Shiva'.

Add Bulk Library Resource (Excel)

This feature is designed for **faster data entry** and efficient catalogue management. It allows librarians to **upload multiple library resources at once** using an Excel file.

The system automatically **reads and validates** the uploaded file to ensure all required fields (like Title, Author, ISBN, Quantity, and Resource Type) are correctly filled. All valid records are then added directly into the library database, saving significant time during large catalogue updates.

Librarians can click on the “**Download Sample Template**” button to get the required upload format. This helps them correctly prepare their data before uploading, ensuring smooth and error-free import.

Manage Library Resources

This page displays a **master list of all library materials** currently available, along with their quantities.

Librarians can easily monitor how many copies are available for each resource, helping in tracking shortages or managing restocking needs.

Library Resource Copies

This section is used to **manage individual copies** of a resource. Librarians can view, add, or update copy details such as **Copy Number, Accession Number, Shelf Location, and Availability Status**. This ensures each physical item is properly tracked.

3.2.2 Fine Management

- Automates fine calculation for overdue items, with reporting for paid and pending fines.
- Automates fine calculation for overdue items, with reporting for paid and pending fines.
- Here you can add a new fine reason and define its amount of fine or you can update the existing fine.

The screenshot displays the 'ICFAI Library Admin' dashboard. On the left is a dark sidebar menu with options: Dashboard, Catalog Management, Circulations, Fine Management, Barcode Generation, New Library Resource Requests, and Reports. The main content area is titled 'Manage Fines'. It features a table labeled 'Existing Fines' with two columns: 'Reason' and 'Fine Amount'. The table lists three entries: 'Book Lost' (500.00), 'Overdue Fine (per day)' (5.00), and 'Front Page Torn' (50.00). To the right of the table is a 'Fine Management' modal window. This modal has tabs for 'Update Fine' and 'Add New Fine'. It contains a 'Select Existing Reason' dropdown menu (currently showing '-- Select existing reason --'), a 'Fine Amount' input field (with placeholder text 'Enter fine amount'), and an 'Update Fine' button at the bottom. The footer of the page reads '© 2025 ICFAI Library Management System | Developed by Shiva'.

Reason	Fine Amount
Book Lost	500.00
Overdue Fine (per day)	5.00
Front Page Torn	50.00

3.2.3 Circulations

The **Circulations** module enables librarians to efficiently manage the flow of library materials, including issuing, returning, renewing, and booking resources. All transactions are recorded securely, ensuring accurate tracking of materials and member activities. The module is divided into three main views:

Issue Library Resource with Barcode

This view allows the librarian to issue books or other resources to library members. The librarian can:

- Search for the user (Student/Faculty) using their ID or Name.
- Select the book/resource to be issued.
- **Scan the barcode** on the book using a barcode scanner.

- If the book **does not have a barcode**, the Librarian should:
 - Assign a new barcode number to the book copy.
 - Print and stick the barcode label onto the book.
 - From the next issue onward, the book can be easily issued by **simply scanning the barcode**.

Return / Renew

This view helps the Librarian or Assistant Librarian manage the **return** or **renewal** of issued books.

Process:

1. When a student or faculty member comes to return books, the Librarian **scans the barcode** on each returned book.
2. Once scanned, the system automatically identifies the book and adds it to the return list.
3. The Librarian can review the details and, if applicable,
 - Add or modify **finest** for late returns.
 - Mark fines as **Paid** or **Unpaid**.
4. If the user wishes to keep the book longer, the Librarian can **renew** it for another issue period (as per library policy).

Booking List

The Booking List view allows librarians to manage reservations or bookings of materials by members. It enables:

- Automatically updating material availability once a booking is confirmed.
- Prioritizing bookings to ensure fair allocation of popular resources.

3.2.4 New Book Requests

Librarians can view all requests submitted by students or faculty for books not available in the library.

They can approve, reject, or mark requests as fulfilled once the book is acquired.

Users are notified automatically when their requested book becomes available.

#	Patron Name	Material Name	Requested Date	Status	Notify if Available
1	Siva Prasad	Physics	07-Oct-2025	Pending	Notify Availability
2	Siva Prasad	Maths	07-Oct-2025	Pending	Notify Availability

3.2.5 Visitor Management

The **Visitor Management** module allows the librarian to record details of individuals visiting the library who are not necessarily borrowing books. This helps maintain daily visitor statistics and track library footfall.

Key Features:

- Record visitor details such as name, purpose of visit, and time of entry/exit.
- View a summary of all visitors for the current day.
- Generate daily or periodic reports of total visitors.
- Helps monitor library usage by non-members or guests.

3.2.6 Counter Management

The **Counter Management** feature enables the librarian to efficiently organize and manage book-issuing counters within the library.

Key Features:

- Add, edit, or remove counters as required.
- Assign counters in sequence to students or staff for book collection.
- Helps distribute workload evenly among counters and reduces waiting time.
- Provides better control and tracking of circulation activities across multiple counters.

3.2.7 Manual Circulation Entry

The **Manual Circulation Entry** module is designed for entering records of books that were already in circulation before the library system was launched. This ensures that all historical data is included in the digital system.

Key Features:

- Manually record book issue and return details.
- Include borrower information, book ID, issue date, and due date.
- Useful for migrating pre-existing circulation records into the new system.
- Maintains a complete and accurate circulation history from both old and new data.

The screenshot displays the 'Manual Circulation Entry' form within the 'ICFAI Library Admin' interface. The form is titled 'Manual Circulation Entry' and contains several input fields: 'Patron ID' (with a value of '0'), 'Requested Date' (with a date picker set to 'dd-mm-yyyy'), 'Issued Date' (with a date picker set to 'dd-mm-yyyy'), 'Title' (with a placeholder 'Enter Book Title'), 'Author' (with a dropdown menu showing '-- Select Author --'), and 'Edition' (with a dropdown menu showing '-- Select Edition --'). Below these fields, there is a 'Status' dropdown menu with 'Issued' selected, and a 'Barcode (Auto Assigned)' field. A green 'Save' button is located at the bottom right of the form. The interface includes a sidebar menu on the left with options like 'Dashboard', 'Catalog Management', 'Circulations', 'Fine Management', 'Barcode Generation', 'New Library Resource Requests', 'Add Counter', 'Manual Circulation Entry Form', 'Visitor Management', and 'Reports'. The top navigation bar shows 'Dashboard' and 'My Profile'. The footer indicates '© 2025 ICFAI Library Management System | Developed by Shiva'.

3.2.8 Reports

The **Reports** module provides librarians with detailed insights into library operations. It generates comprehensive reports on material availability, issued books, requests, overdue items, and fines. Each report is displayed in a dedicated view for easy access and management.

Availability Report

This report shows the current status of all library materials. Features include:

- Listing all available resources by category or type.
- Tracking quantities of each material.
- Highlighting materials that are low in stock or unavailable.

The screenshot shows the 'Availability Report' page in the ICFAI Library Admin system. The page has a blue header with 'ICFAI Library Admin' and 'Dashboard My Profile'. A dark sidebar on the left contains a 'Menu' with options: Dashboard, Catalog Management, Circulations, Fine Management, Barcode Generation, New Library Resource Requests, and Reports. The main content area has a title 'Availability Report' and search filters for Title, Author, and Book Type. Below the filters is a table with columns: Title, Author, Book Type, Total Quantity, Available Quantity, Issued Quantity, and Book Lost Quantity. The table lists 15 items, mostly physics and chemistry books, with their respective quantities.

Title	Author	Book Type	Total Quantity	Available Quantity	Issued Quantity	Book Lost Quantity
Physics	Robert Resnick and David Halliday	Book	2	2	0	0
Physics	John D.Cutnell and Kenneth W Johnson	Book	4	4	0	0
Physics	Marcelo Alonso,Edward J.Finn	Book	2	2	0	0
The Elements of Physics	I S Grant, W R Phillips	Book	2	2	0	0
Introduction to Modern Physics	F.K.Richtmyer and E.H.Kennard	Book	1	1	0	0
Interactive Physics	R.Ravi, P.Kamaraj, P.Ranganathan	Book	2	2	0	0
Physics Experiments And Projects For Students	C.Isenberg and S. Chomet	Book	2	2	0	0
Solutions To I.E.Irodov's Problems In General Physics	Abhay Kumar Singh	Book	2	2	0	0
Elements of Physical Chemistry	Peter Atkins, Julio De Paula	Book	2	2	0	0
Essentials of Physical Chemistry	Arun Bahl and B.S.Bahl	Book	1	1	0	0
Principles of Physical Chemistry	B.R.Puri and L.R.Sharma	Book	1	1	0	0
Physical Chemistry	Ira N. Levine	Book	1	1	0	0
Physical Chemistry	Gordon M.Barrow	Book	1	1	0	0

Requested Report

Displays all material requests made by members. Key features:

- Viewing pending, approved, and rejected requests.
- Tracking member-wise request history.
- Prioritizing requests to manage demand efficiently.

The screenshot shows the 'Requested Materials Report' page in the ICFAI Library Admin system. The page has a blue header with 'ICFAI Library Admin' and 'Dashboard My Profile'. A dark sidebar on the left contains a 'Menu' with options: Dashboard, Catalog Management, Circulations, Fine Management, Barcode Generation, New Library Resource Requests, and Reports. The main content area has a title 'Requested Materials Report' and date filters for 'From Date' and 'To Date'. Below the filters is a table with columns: Requested Date, Requested By, Book Title, and Status. The table shows two requests made by 'Siva Prasad' on 10-10-2025.

Requested Date	Requested By	Book Title	Status
10-10-2025 13:57:24	Siva Prasad	2000 Tips for Trainers and Staff Developers	Requested
10-10-2025 14:46:11	Siva Prasad	3000 Solved Problems in Chemistry	Requested

Issued Report

Shows details of all issued materials. Includes:

- Member-wise issue records.
- Material details with issue and due dates.
- Easy tracking of currently issued items and their status.

The screenshot shows the 'Issued Materials Report' page in the ICFAI Library Admin system. The interface includes a top navigation bar with 'Dashboard' and 'My Profile' links. A left sidebar menu lists various library management functions. The main content area features a title 'Issued Materials Report', date selection fields for 'From Date' and 'To Date' (both in dd-mm-yyyy format), and 'Filter' and 'Clear' buttons. Below these is a table with the following headers: Patron Name, Book Title, Due Date, and Status. The table body is currently empty.

4. Overdue Report

Lists all materials that are overdue. Provides:

- Member and material details for overdue items.
- Number of days overdue.
- Option to trigger reminders or alerts to members.

The screenshot shows the 'Overdue Materials Report' page in the ICFAI Library Admin system. The layout is identical to the 'Issued Materials Report' page, featuring a top navigation bar, a left sidebar menu, and a main content area with the title 'Overdue Materials Report'. It includes date selection fields for 'From Date' and 'To Date' (dd-mm-yyyy format), 'Filter' and 'Clear' buttons, and a table with headers: Patron Name, Book Title, Due Date, and Status. The table body is currently empty.

Fine Report

Generates a summary of fines collected or pending. Features include:

- Member-wise fine details.
- Total fines for a specific period.
- Tracking unpaid fines for follow-up.

The screenshot displays the ICFAI Library Admin web application. The top navigation bar is blue with the text "ICFAI Library Admin" on the left and "Dashboard" and "My Profile" on the right. A dark blue sidebar menu on the left contains the following items: Dashboard, Catalog Management, Circulations, Fine Management, Barcode Generation, New Library Resource Requests, and Reports. The main content area has a light gray background and is titled "Fine Report". Below the title, there are two date input fields labeled "From Date" and "To Date", both with the placeholder "dd-mm-yyyy" and a calendar icon. To the right of these fields are two buttons: "Filter" (blue) and "Clear" (gray). Below the date fields, a light blue message box states "No fine records found for your library.". At the bottom of the page, a gray footer contains the text "© 2025 ICFAI Library Management System | Developed by Shiva".

3.3 Student / Faculty Dashboard

The **Dashboard** provides students and faculty with a quick overview of their library activities and easy access to all related features. It is designed to be intuitive, informative, and interactive.

Dashboard Overview:

The main dashboard displays summary **cards** for quick insights:

- **Active Issues:** Shows the total number of books currently issued to the user. Clicking the card navigates to the **Active Issues** view with full details in a table format.
- **Overdue Items:** Displays the number of overdue materials. Clicking this card redirects to the **Overdue List** view.
- **Pending Reservations:** Shows requests made for materials that are awaiting approval or availability. Links to the **My Reservations** view.
- **Pending Bookings:** Displays materials booked but not yet issued. Clicking takes the user to the **My Bookings** view.

Menu Navigation:

The side menu provides easy access to all relevant sections:

1. **Dashboard** – Main overview with activity cards.
2. **Borrow Library Resource** – Search and borrow available materials.
3. **My Reservations** – View and manage all pending and approved reservations.
4. **My Bookings** – Track and manage all material bookings.
5. **Borrowed History** – View history of all issued materials.
6. **Overdue List** – Detailed list of overdue items and applicable fines.

Each menu item links to its dedicated view, providing a smooth and organized navigation experience.

3.3.1 Borrow Library Resource

- Allows users to search for available books or materials and initiate the borrowing process.
- Displays real-time availability and issue options.

3.3.4 Borrowed History

- Provides a complete record of all previously issued materials.
- Helps users track their borrowing history for reference or review.

Issued History List	
Your booking list is empty.	

3.3.5 Overdue List

- Lists all materials that are overdue along with applicable fines.
- Enables users to take timely action to avoid penalties.

3.3.6 Terms & Conditions

Through this module, librarians can define, update, and display the library's usage policies and rules to all users. It helps maintain transparency and ensures that every member is aware of the library's operational guidelines.

4. System Workflow

The system follows a role-based workflow where users log in, perform actions based on their permissions, and data is recorded in the central database for monitoring and reports.

5. Troubleshooting & Help

This section provides guidance on resolving common issues users may encounter while using the library system. Quick reference solutions help ensure uninterrupted access and smooth operation.

Key Points:

- **Login Issues:** Check username/email and password; reset password if forgotten.
- **Book Not Available:** Verify catalogue search filters; request the book through the **New Book Request** option.
- **Renewal/Return Errors:** Ensure the book is issued to your account; contact the librarian if discrepancies persist.
- **System Errors:** Refresh the page or log out and log in again; contact support if the problem continues.

Tip: Contact the library support team for unresolved issues.

6. Security & Access Control

The system is designed with robust security measures to protect user data and library resources. Access is strictly controlled based on user roles.

Key Features:

- **Secure Authentication:** Users must log in with valid credentials to access the system.
- **Encrypted Passwords:** Passwords are stored securely using encryption techniques to prevent unauthorized access.
- **Role-Based Access Control:** Features and data are accessible only according to the user's role (Librarian, Assistant, Student, or Faculty).
- **Session Management:** Active sessions are monitored, and automatic logout ensures protection against unauthorized use.

7. Future Enhancements

To make the library system even smarter and more convenient, several improvements are planned for future updates. These include:

- **RFID Integration:** For faster and contactless book issue and return.
- **Mobile App Support:** Allowing users to access library services anytime, anywhere.
- **AI-Based Book Recommendations:** Providing personalized reading suggestions based on user interests and borrowing history.

8. Conclusion

- Ensures **efficient management** of all library operations digitally.
- Provides **transparent tracking** of books, issues, returns, and reservations.
- Simplifies **circulation and resource management** for librarians and users.
- Enhances **accessibility** and **user convenience** for students and faculty.
- Serves as a **reliable solution** for modern educational institutions seeking organized and productive library management.
